

CANDIDATE LIST FOR ENDANGERED SPECIES EFFECTS DETERMINATIONS  
for the time period January 1, 2003 to July 1, 2003

Fourteen determinations and requests for consultations, as appropriate, are scheduled for completion during this time period. Below are candidates the Agency anticipates it will consider during this 6-month time period. However, the Agency may, at its discretion, substitute other pesticides for those listed below. In order that the public may better focus their input, we have provided for each candidate pesticide, the types of uses likely to be subject to review and the types of species for which potential effects may be assessed during this 6-month time period.

<b>Candidates for Endangered Species Effects Determinations - 1/1/03 to 7/1/03</b>		
PESTICIDE	USES	SPECIES
2,4-D-2 ethylhexyl ester	forest operations	CA forest plants
acroliein	various	CA salmonids
atrazine	all	Pacific salmonids
	forest operations	CA forest plants
azinphos methyl	all	Pacific salmonids
carbaryl	all	Pacific salmonids
chlorpyrifos	all	Pacific salmonids
dicamba	all	Pacific salmonids
dichlobenil	all	Pacific salmonids
diuron	all	Pacific salmonids
glyphosate	forest operations	CA forest plants
hexazinone	forest operations	CA forest plants
imazapyr	forest operations	CA forest plants and CA salmonids
methomyl	all	Pacific salmonids
norflurazon	all	Pacific salmonids
oryzalin	all	Pacific salmonids
phosmet	all	Pacific salmonids
simazine	all	Pacific salmonids
sulfometuron methyl	forest operations	CA forest plants and CA salmonids
thiodicarb	all	Pacific salmonids
triclopyr BEE	forest operations	CA forest plants
triclopyr TEA	forest operations	CA forest plants
